Amphenol RF

Amphenol RF is a division of Amphenol Corporation, one of the largest manufacturers of interconnect products in the world. With experience extending over half a century, our complete range of RF interconnect solutions are used in Automotive, Broadband, Wireless LAN/RFID, Wireless Infrastructure, Military Aerospace and Instrumentation markets. Our solutions are highly customized to customer requirements and range from connectors to cable assemblies to passive RF components, such as attenuators and RF switches. Amphenol RF facilities are strategically located to provide Design Engineering, Manufacturing and Distribution of our products to customers throughout the world.

Our facilities hold certification such as ISO 9001:2000, ISO/TS 16949:2002 and ISO 14001:2004. Amphenol RF continues a tradition to be a world leader for environmental issues for our global marketplace. The RoHS 2002/95/EC directive is the most recent activity directed at electrical and electronic products in the environmental area. There are many additional directives worldwide, currently in process and we are working to assure our complete compliance to these requirements well ahead of regulation requirements. All of our Quality Management System registrations are available to view or print at www.amphenolrf.com.
