

Overview

Amphenol RF offers a full line of SMA to AMC fixed length cable assemblies featuring the popular threaded SMA interface and the ultraminiature AMC connector. These assemblies are available in both IP67 and non-IP67 configurations on industry-standard micro-coax cable types. SMA to AMC assemblies are ideal for applications that require a space efficient solution.

SMA to AMC cable assemblies feature a small footprint and low profile and proves reliable electrical performance up to 6 GHz. These 50 ohm assemblies are compatible with the industry-standard U.FL interface for additional mating options.

Non-IP67 assemblies offer a smaller flange and no o-ring seal whereas waterproof IP67 assemblies are designed to offer an extra layer of protection from external elements. Both IP67 and non-IP67 assemblies can accommodate panels up to 6.71 mm and 3.20 mm respectively.
